

Plaster texture

# DEKORTA

*viktória*

# Technical sheet Plaster texture DEKORTA

## Description

### Properties:

- Non-swelling and rot-proof.
- Dimensionally stable.
- Highly stable in wet conditions.
- Bridges small cracks and protects the substrate from mechanical stress.
- Pressure-sensitive substrates become more stable.
- The use of nails or screws will not damage the plaster coating.
- Depending on the system of application:
  - scrub-resistant.
  - Allows cleaning.
  - Resistant to disinfectants
  - Flame-retardant
  - Non-combustible
  - Increases the scrap, shock and impact resistance levels.
  - Permits diffusion / Absorption.
- Cost-effective, repeated renovations are possible by recoating. When a fundamental change is desired after many renovations, then a coatable surface can be prepared

### Weight:

0.5 kg per 1m<sup>2</sup>

### Dimensions

slabs patterns - 0.5x1 m

rolled plaster - 2.7 x 1 m

Slabs pictures - individually

### Package:

20pcs ..10m<sup>2</sup>

### Storage:

Store Dekorta glass fleece in a dry place.

### Substrate:

The substrate must always be firm, dry, sound, clean, even, smooth and free from separable substances that may prevent adhesion. In case of only one coating or use of wallstains, the colour-contrast of the substrate must be neutralized, by applying a pigmented primer on the substrate.

### Field of Application:

Dekorta plaster texture are high-valued predominantly mineral wall-coverings for the interiors and exteriors.

By combination of the deep texture design and shade exclusively attractive wallsurfaces can be designed.

### Special-Features:

Fixing cracks on the wall.

The plaster-texture is visible even after lot of repeated renovations.

### Material:

Dekorta consists of soft glass fleece with plaster coating.

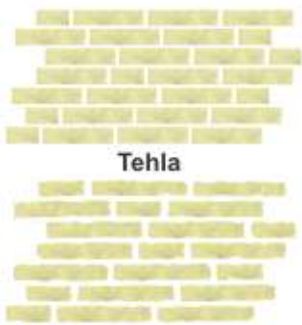

The mineral-like characteristics of the glass-fleece and quartz is distinctly visible on the surface.
